PREMIUM DEEP CYCLE AGM BATTERIES

fullriverbattery.com

Why Choose a Fullriver Premium AGM Battery?

Whether you're considering a traditional flooded battery or the latest in lithium, Fullriver has one thing that sets us apart from the pack; hassle-free, safe, and reliable batteries. No maintenance, no corrosion, and no worries about sensitive electronics slowing down your vehicle or disrupting your game. Our EGL and DC Series batteries are built to last longer than traditional batteries and offer a high reserve capacity made to withstand the deep discharge and high-amp recharge common to electric vehicle use. In addition to saving you from having to fill batteries or replace corroded cables, our deep-cycle batteries are constructed using pure lead plates and are optimized to provide steady, reliable current output over long periods of time.

Whether you have one machine or a fleet, Fullriver AGM batteries come in a variety of sizes, configurations, and Ah ratings to give you exactly what you need to keep you moving. If you're considering a new set of batteries for your ride, look no further than Fullriver.

BUILT BETTER.

- ABS plastic is more rigid than PPE; does not bulge under normal operation.
- Rigid casing - Epoxy sealed case increases PSI limits.
- Pure lead allows for more efficient transfer of electricity during discharge and recharge; less energy lost to heat.
- Over partition welding (OPW) provides greater shock and vibration resistance.
