

SUPREME DEEP CYCLE AGM BATTERIES

GOLF & ELECTRIC VEHICLES

The DC & EGL Series: True Deep-Cycle Batteries—Designed For Electric Vehicles

The EGL Series is a true deep-cycle battery equipped to handle the challenges golf carts and other electric vehicles. With special grids, paste, active material, and recombinant valves, EGL series can keep up on the steepest terrain, in hot and cold environments, day after day, year after year. High compression cells connected with OTP (Over-The-Partition) technology ensure resilience when the road gets bumpy. The hassle-free, zero-spill technology allows for creative mounting, with no corrosion or dangerous gassing, and no watering required.

A Size To Fit All Your Needs

The EGL Series comes in 4 of the most popular sizes for golf and electric vehicles. Available in 6, 8, and 12 volts. GC2, GC2H, GC8, and Group 31.

CHOOSE FULLRIVER BATTERY

The EGL Series of batteries is a wholly redesigned deep-cycle battery, focused on long-life and performance in electric vehicles. With specially designed grids, reformulated paste, and dense active material, the EGL series offers 50% more life than any other traditional battery. Like all Fullriver batteries, the EGL Series incorporates very low internal resistance allowing for charge rates up to 35% of total amperage for faster charging.
