

PREMIUM HIGH-CRANKING AGM BATTERIES

fullriverbattery.com

Why Choose a Full Throttle Premium AGM Battery?

No matter what type of powersports vehicle you drive, having constant, reliable power is key. The Full Throttle FT Series is a group of heavy duty, maintenance-free batteries constructed with pure lead plates that are tightly packed together to provide you with a **serious power boost**. All of our FT Series batteries are designed to have massive starting power and provide **extreme shock and vibration resistance**, making them an excellent choice for vehicles that roam through extreme conditions.

Full Throttle batteries are designed to deliver immense starting power every time no matter what the conditions are, with enough juice to power all your accessories along the way. High compression cells connected with OTP (Over the partition) technology ensures resilience when the road gets bumpy. The hassle-free, zero-spill technology allows for creative mounting, with no corrosion or dangerous gassing. Don't settle for less when you can power up your mean machine with a Full Throttle Battery.

BUILT BETTER.

- ABS plastic is more rigid than PPE; does not bulge under normal operation.
- Rigid casing - Epoxy sealed case increases PSI limits.
- Pure lead allows for more efficient transfer of electricity during discharge and recharge; less energy lost to heat.
- Over partition welding (OPW) provides greater shock and vibration resistance.
